**OR**

Click Start, All Programs, Accessories, Windows Explorer.

When Windows Explorer opens make sure you have an address bar (will probably say My Documents)

If not, in the menu at top click View, Toolbars, and select Address Bar.

Copy and paste this into the Address Bar window and click go:

**When the ftp window opens all you need to do is drag the folder with the images from your desktop into the open ftp window. Regardless of what the time calculator says it should only take a few minutes for the images to upload.**

If you prefer sending us a CD/DVD of your images please send to:
